

As an ISO 9001:2015 certified environmental engineering organization backed by domain experts with a combined experience of 50+ years, we have built a reputation for ourselves as a trusted company with proven credentials. While our most important forte is our ability to offer value added solutions for our customers' myriad requirements across segments, what have made us successful are a few distinctive strengths.

► Integrated Solutions

We are an integrated solutions provider in the environmental space - which means we not only supply you the right products but also deliver an array of services that meets your needs in an end-to-end manner. Right from analyzing your requirements, technology selection, identifying and optimizing solutions, recommending and supplying standardized equipment and products of superior quality, designing, manufacturing, erecting, commissioning and operating projects and also backing it with the requisite after-sales support, we will be there with you, rock solid. Korgen is truly a one-stop shop for all your needs in **water purification, water treatment, sewage treatment, air purification** and **solar energy segments**.

► Cutting-edge Technologies and Best-in-Class Brands

Our highly skilled technocrats use globally acclaimed cutting-edge technologies and well established processes that give precision results. Technology selection is meticulously done to ensure that your product delivers optimal performance with enhanced operational efficiency and reduced footprints.

Whether it is standard or customized solutions, all the products, specialist equipment, components, spares and chemicals we use come from best-in-class companies and we only opt for certified products from market-leading global and national brands. This results in shorter downtimes, high process reliability and lesser running costs besides giving the product a very long operational life.

► Seamless After-Sales Service

We provide a comprehensive selection of structured after-sales services to ensure that your product delivers optimal performance. Be it reinstallations, user training, periodic review visits, troubleshooting support, preventive maintenance services, upgrades, supply of spares and consumables and cloud-based remote monitoring, our qualified and well-trained field service engineers will be at your disposal to address your requirements.

Our Value Added Services* such as Round-the-clock Complaint Registration Facility, Dedicated Customer Helpline, Holiday Service, Extended Warranties, Money Back Guarantee Schemes and Flexible Service Contracts are a deep reflection of our unwavering commitment to customer satisfaction.

* On select products/models and subject to conditions

► Custom-Built High Quality Products

With our deep technical expertise and extensive experience that help us gain critical insights into the complex challenges in different industries, our engineering team has the capability to design innovative and need-centric solutions for a variety of applications in the residential, commercial and industrial segments. We objectively evaluate the site conditions, conduct feasibility studies, recommend cost-effective solutions, run pilots if necessary and build fully customized and modular products from ground up that meet specific application demands and stringent quality standards to deliver exceptional performance.

► Project Execution Capabilities

Regardless of the size of the projects we undertake, we leverage advanced digital tools and apply the best project management practices to ensure that the project is qualitatively executed and completed within the agreed timeframe and budgets. At KORGEN, our project execution methodologies and capabilities have evolved over the years from the hands-on experience of our team members who have overseen and managed hundreds of projects of varying sizes, individually and as part of us.

Implementing good engineering practices to deliver vastly superior performance at significantly lower cost of ownership is central to our idea of nurturing a lifetime relationship with our customers.

► Competitive Pricing

As an organization, we strongly believe that any business, to achieve sustainable success, has to work towards offering truly value-for-money products to their customers. At Korgen, while we ensure that our products comply with the highest quality levels, we also strive to optimize costs across functions to achieve cost leadership in every sphere of our enterprise operations. In-house design capability, lean manufacturing practices, astute inventory management, long-term procurement contracts, robust project execution skills, simplified operations, digitized work processes and a flat hierarchy are amongst the many measures we have taken to significantly improve productivity and reduce operating costs.

This helps us in offering our products and undertake projects at very competitive prices resulting in substantial savings for our customers.

Value Adds Offered*

- ✔ Trusted Brands
- ✔ Comprehensive Warranty
- ✔ Multiple Payment Options
- ✔ Dedicated Service Helpline
- ✔ Special Extended Warranty
- ✔ Easy EMIs
- ✔ Holiday Service
- ✔ Free Installation
- ✔ Superfast Delivery

* Offered for select products and models. Conditions Apply
